SUBJECT INDEX TO VOLUME 62

A. alternata
  triorganosilicon(IV) compounds and, 67
A. niger
  triorganosilicon(IV) compounds and, 67
Acetato(dimethyl)(pyridine-2-carbaldehydethiosemicarbazonato)tin(IV) acetic acid solvate, [$SnMe_2$(PyTSC)(OAc)].HOAc
  synthesis, structure, and spectroscopic studies, 41
N-Acetylcysteine
  thiyl radicals formed from, 199
Adenosine
  copper(II)/adenosine
    binding sites and complex stability, 103
Amorphous calcium phosphates
  hydrated sites in biogenic, 183
Angiotensin I-converting enzyme
  cobalt-substituted Zn-protein, 147
Antibiotic resistance of bacteria
  palladium(II) complexes of phenothiazines, 171
Antiplasmid activity on bacteria
  palladium(II) complexes of phenothiazines, 171
Antitumor activity
  acetato(dimethyl)(pyridine-2-carbaldehydethiosemicarbazonato)tin(IV) acetic acid solvate, [$SnMe_2$(PyTSC)(OAc)].HOAc, 41
  cisplatin analogs that bear *o*-phenylenediamine ligands, 281
  copper(II)-mitoxantrone complex, 137
Arsonolipids
  isozyme II inhibition with 2,3-dihydroxypropylarsonic acids and, 207
Azide
  binding to cytochrome *c*, 213
Bacteria
  palladium(II) complexes of phenothiazines and antiplasmid activity, 171
^{13}C NMR relaxation studies
  gadolinium(III) complex, 127
Cadmium(II)
  interaction with fructose 2,6-bisphosphate and analogs, 57
Caffeine
  reactivity response of heme proteins, 155
Calcium phosphates
  hydrated sites in biogenic amorphous, 183
Calcium(II)
  interaction with fructose 2,6-bisphosphate and analogs, 57
Carbonic anhydrase
  8-quinolinsulfonamide(Hsa), 31
Carbonic anhydrase inhibitors
  isozyme II inhibition with 2,3-dihydroxypropylarsonic acids and arsonolipids, 207
1,2-Catechol ligands
  chromate anion reaction, 223
Chromate anion
  reaction with 1,2-catechol or 3,5-di-*tert*-butyl-1,2,-catechol ligands, 223
Chromium(III)
  monoanionic complexes of 1,2-semiquinones, 223
Ciprofloxacin
  fluoroquinolone antimicrobial
    copper(II) complexes, 1
Cisplatin analogs
  o-phenylenediamine ligands and, 281
Cobalt
  xanthine oxidase activity inhibition, 271
Cobalt-substituted angiotensin I-converting enzyme
  electron paramagnetic resonance studies, 147
Cobalt(III) oligopeptide complexes
  nitrogen-15 NMR, 117
Copper(II)/adenosine
  binding sites and complex stability, 103
Copper(II) complexes
  fluoroquinolone antimicrobial ciprofloxacin, 1
Copper(II)-mitoxantrone complex
  antitumor activity and DNA synthesis, 137
Copper(I)$_6$-thionein
  stable thiyl radicals and dried yeast, 199
Crab granules
  amorphous calcium phosphates, 183
Cyanide
  binding to cytochrome *c*, 213
Cysteine
  thiyl radicals formed from, 199
Cytidine/putrescine systems
  binding sites and complex stability, 103
Cytochrome *c*
  ligand binding, 213
D_1 domain
  nitrate reductase
    Pseudomonas aeruginosa, 77
3,5-Di-*tert*-butyl-1,2,-catechol ligands
  chromate anion reaction, 223
Dichloro(*o*-phenylenediamine)platinum(II) complexes
  antitumor activity, 281
2,3-Dihydroxypropylarsonic acids
  isozyme II inhibition with arsonolipids and, 207
1,2-Dimethyl-3-hydroxypyrid-4-one
  strucutre, 127
DNA synthesis
  copper(II)-mitoxantrone complex, 137
  Drug-protein interactions, 155
Escherichia coli
  FNR and, 89
Ethylenediamine-*N,N,N',N'*-tetraacetic acid (EDTA)
  metallothionein reaction, 243
F. oxysporum
  triorganosilicon(IV) compounds and, 67
Fecal radioactivity
  zinc homeostasis and, 231
Fluoride
  binding to cytochrome *c*, 213
Fluoroquinolone antimicrobial ciprofloxacin
  copper(II) complexes, 1
FNR
  reactivity of *N*-terminal cysteine residues, 89
Fructose 2,6-bisphosphate and analogs
  divalent metal ion interaction, 57
Gadolinium(III) complex
  ^{13}C NMR relaxation studies, 127
Glutathione
  thiyl radicals formed from, 199
Glycine
  tin(II) hydrolysis and complexation with, 17
Hemoglobin
  two-site binding of heterocyclic ligands, 155
Heterocyclic ligands
  two-site binding to monomeric hemoglobin, 155
Homeostasis
  zinc, 231
Hydroxyapatite
  amorphous calcium phosphates and, 183
5-Hydroxy-2-hydroxymethyl-1-methylpyrid-4-one structure, 127
Imidazole
  binding to cytochrome *c*, 213
Invertebrate cells
  amorphous calcium phosphates, 183
Iron
  metal-ion binding properties, 253

PII S0162-0134(96)00073-6

Iron(II)
FNR interaction, 89
Isozyme II inhibition
2,3-dihydroxypropylarsonic acids and arsonolipids, 207
Magnesium
xanthine oxidase activity inhibition, 271
Magnesium(II)
interaction with fructose 2,6-bisphosphate and analogs, 57
N-2-mercaptopropionylglycine
thiyl radicals formed from, 199
Mercaptosuccinic acid
thiyl radicals formed from, 199
Mercury
xanthine oxidase activity inhibition, 271
Metal ions
bovine xanthine oxidase activity inhibition, 271
interaction with fructose 2,6-bisphosphate and analogs, 57
metallothionein and metabolism, 243
transferrins and binding properties, 253
Metal(II)-8-quinolinsulfonamidato (sa^-)
complexes
synthesis and characterization, 31
Metallothionein
reaction with ethylenediamine-*N,N,N′,N′*-tetraacetic acid, 243
Mitoxantrone complex
antitumor activity and DNA synthesis, 137
Nickel
xanthine oxidase activity inhibition, 271
Nitrate reductase d_1 domain
Pseudomonas aeruginosa, 77
Nitrogen-15 NMR
cobalt(III) oligopeptide complexes, 117
N-Terminal cysteine residues
reactivity in FNR, 89
Oligopeptide complexes
nitrogen-15 NMR and cobalt(III), 117
P. mirabilis
triorganosilicon(IV) compounds and, 67
Palladium(II) complexes of phenothiazines
antiplasmid activity on bacteria, 171
Pancreas
zinc homeostasis and, 231
Penicillamine
thiyl radicals formed from, 199
Phenothiazines
palladium(II) complexes
antibiotic resistance of bacteria, 171
o-Phenylenediamine ligands
cisplatin analogs that bear, 281
Platinum complexes
cisplatin analogs that bear *o*-phenylenediamine ligands, 281
Protein
bivalent tin complexation, 17
Pseudomonas aeruginosa nitrate reductase
isolation and characterization of d_1 domain, 77
Purine
reactivity response of heme proteins, 155
Putrescine
cytidine/putrescine systems
binding sites and complex stability, 103
Pyridine
binding to cytochrome *c*, 213
8-Quinolinsulfonamide(Hsa)
metal complexes, 31
S. viridans bacteria
triorganosilicon(IV) compounds and, 67
Silicon(IV) compound coordination
triorganosilicon(IV) compounds
synthesis, structural study, and biological activity, 67
Sodium dichromate
reaction with 1,2-catechol or 3,5-di-*tert*-butyl-1,2,-catechol ligands, 223
Sulfur radical species
formation and stabilization, 199
Tetraglycinato ligand coordination, 117
Theophylline
reactivity response of heme proteins, 155
Thiyl radicals
dried yeast copper(I)$_6$-thionein and stable, 199
Tin
protein interactions with bivalent, 17
Tin(II)
hydrolysis and complexation with glycine, 17
Tin(IV)
acetato(dimethyl)(pyridine-2-carbaldehydethiosemicarbazonato)tin(IV) acetic acid solvate, [$SnMe_2$(PyTSC)(OAc)].HOAc
synthesis, structure, and spectroscopic studies, 41
Transferrins
metal-ion binding properties, 253
Triorganosilicon(IV) compounds
synthesis, structural study, and biological activity, 67
Vanadium-51 NMR study
metal-ion binding properties of transferrins, 253
Xanthine oxidase activity inhibition
mercury and, 271
Zinc
xanthine oxidase activity inhibition, 271
Zinc homeostasis
mechanism, 231
Zinc protein angiotensin I-converting enzyme
cobalt-substituted, 147
Zinc(II)
interaction with fructose 2,6-bisphosphate and analogs, 57
synthesis and characterization, 31
